FOR IMMEDIATE RELEASE

AIR REPAIR, INC. STRIKES RED LINE BRAKE MANUFACTURING DEAL

Cleveland, November 29, 2022 – Air Repair, Inc. is pleased to announce its' exclusive agreement to manufacture Red Line Brakes for Stearman and North American T6 aircraft.

“I’m thrilled to have the opportunity for our team to produce Red Line Brake kits” says Pete Jones, President Air Repair, Inc. “We’ve sold and installed more kits than anyone over the years and I’m glad we’ll finally have a hand in the production. I feel Red Line Brakes are the single most significant improvement to the Stearman – ever.”

Red Line Brake kits are fully STC’d and can be installed in Boeing Stearman and North American T6 aircraft. In addition to FAA PMA producing and selling Red Line Brake kits, Air Repair, Inc. has a complete line of Red Line replacement parts for Stearman and North American T6 aircraft.

For more information contact Pete Jones, pete@airrepairinc.com or call 662.846.0228

Air Repair, Inc. is a full-service agricultural aircraft repair shop, including service, maintenance and sales of Air Tractor, Thrush, and more. With over 40 years in the aircraft business, Air Repair, Inc. specializes in annual and routine inspections, major and minor airframe repairs, and Radial engine overhauls. Air Repair, Inc. is proud to be an F.A.A. approved Avionics Repair Station and the manufacturer of Red Line Brake kits.
